Title of the undertaking:	International mobility of students as a tool supporting the fight against digital exclusion of people with disabilities
Group members:	Weronika, Martyna, Jakub, Kosta, Miłosz
Mobility period:	10.11.2019 -16.11.2019

Inroduction

Following the rules of WCAG 2.0 standard the group prepared the accessibility audit of two global newspapers (abc.net.au and Washingtonpost.com). Web Content Accessibility Guidelines (WCAG) 2.0 covers a wide range of recommendations for making Web content more accessible. Following these guidelines will make content accessible to a wider range of people with disabilities, including blindness and low vision, deafness and hearing loss, learning disabilities, cognitive limitations, limited movement, speech disabilities, photosensitivity and combinations of these. Following these guidelines will also often make your Web content more usable to users in general.
